Take the guesswork out of managing your pool.

Chemigem D10 V

Water management solutions for
Domestic Pools

36 YEARS OF BALANCE, EXPERIENCE & INNOVATION
36 YEARS

Domestic Controllers

The award winning Chemigem Range of chemical dosing systems is where it all started for Pool Controls. The Chemigem D10 is suitable for domestic pools of all shapes and sizes and gives you total control over sanitizer levels and pH. The Chemigem uses a multi-electrode (probe) to analyse water quality whenever the system is running and adds precise doses of chlorine and acid to maintain optimum water quality.

Precise dosing is via the highly-efficient solenoid valves.

Pool Controls, bringing you innovative Australian-made water management systems for over 36 years.

Pool Controls is ***100% Australian-owned*** and specialises in swimming pool sanitation.

Pool Controls will provide you with balanced advice on the best solution for your pool - so you can get the most out of your investment.

POOL CONTROLS

Chemigem D10 V

D10 DUAL VALVE
D10 VP SINGLE VALVE

Fully-Automated Water Management System

The Chemigem D10 Water Management System measures water quality and adds precise doses of chemicals to ensure that your pool is clean and safe to swim in. With a Chemigem, the "hit and miss" methods of dosing by hand are a thing of the past. Pool water chemistry is regulated automatically – providing optimum levels of water sanitation while using less chlorine and acid. ***This means you get a better result – and save money!***

- ***D10 valve models are the fastest way to sanitise any swimming pool***
- ***The D10VP model has the ability to control salt pools via the AUX menu***
- ***The D10V has been awarded SPASA Product Sustainability Award***
- ***Single long life salt probe which reduces cost to the consumer***
- ***The Chemigem D10 is covered by a full 3 year Manufacturer's warranty – see our Product Catalogue or visit poolcontrols.com.au for full warranty terms.***

Total control and peace of mind

Whenever your pump is running, your Chemigem is working. The Chemigem tests the water continuously and can add precise doses of chemicals over 30 times each hour if required. The Chemigem measures pH (a measure of the acidity of pool water) and ORP (Oxidation Reduction Potential – a measure of the level of effective chlorine in the water). ***It is important that both pH and ORP are maintained within a safe range.***

Choose a Chemigem to suit your needs

Your pool is as unique as you are – and Pool Controls offers a range of different Chemigems to suit varied applications. Your Chemigem can be programmed to control other pool accessories – such as pool lighting and in-floor cleaning systems and is compatible with heating systems and energy saving pumps. Chemigems can be used to control either chemical dosing systems, or salt water chlorination systems. ***Chemical dosing can either be via solenoid valves or peristaltic pumps.***

CHEMIGEM D10 DUAL VALVE

Chlorine and pH controller suitable for most pools, with built-in pool circulation pump timer. Supplied with solenoid valves.

CHEMIGEM D10 VP SINGLE VALVE

Chlorine and pH controller to operate salt chlorinator for chlorine, with pH controlled and acid fed by suction solenoid valve.
